

PRAVEEN GUPTA

Backend Engineer Full Stack Engineer AI / GenAI Engineer

praweengupta11001@gmail.com · +91 63885 53560 · Varanasi, UP, India github.com/PraveenGupta11001
linkedin.com/in/praveen-gupta-b783791b4

Full-stack and AI engineer with ~3 years of experience designing and shipping production-grade SaaS platforms, REST APIs, and LLM-powered systems. Specialise in Python (FastAPI, Django), React/Next.js, and agentic AI workflows (LangChain, LangGraph, RAG). Built and optimised multi-tenant backends serving live customers, delivered up to 80% API performance gains, and architected OAuth 2.0 integrations with CRMs, payment platforms, and developer tools. Comfortable owning systems end-to-end — from solution design and database schema to CI/CD pipelines and production monitoring. Targeting high-growth product companies, AI startups, and remote-first engineering teams.

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript

Backend: FastAPI, Django, Django REST Framework, REST API Design, JWT, OAuth 2.0, Celery, Redis

Frontend: React.js, Next.js, Tailwind CSS, Shadcn UI

AI / GenAI: LangChain, LangGraph, RAG, AI Agents, Agentic Systems, LLM Workflows, Vector Databases, Prompt Engineering

Databases: PostgreSQL, MySQL, Snowflake

DevOps & Cloud: Docker, GitHub Actions, AWS, Azure Blob Storage, Azure Data Factory, Sentry

Integrations: Salesforce, HubSpot, Pipedrive, GitHub, Jira, Google Sheets, Zapier, n8n, Webhook Automation, Apollo, Klaviyo, Wix

PROFESSIONAL EXPERIENCE

Chirpn IT Solutions LLP | **AI Engineer**

May 2026 – June 2026 · Remote

- ▶ Architect and maintain OAuth 2.0 integration layer for Perceivenow.ai connecting Klaviyo, Wix, Apollo.io, Huggingface, GitHub, and Jira via FastAPI; designed token-refresh and multi-tenant credential-storage patterns enabling zero-downtime third-party auth across all platform tiers.
- ▶ Engineer agentic AI workflows and LLM-powered features on the Perceivenow.ai platform — designing prompt pipelines, tool-calling chains, and retrieval-augmented (RAG) modules that surface actionable intelligence from integrated data sources.
- ▶ Deliver full-stack product features using React, Next.js, and Supabase Auth; own the frontend-to-API contract, structured logging strategy (Sentry), and PostgreSQL schema for new product surfaces.
- ▶ Own solution design and technical scoping for new AI features end-to-end — from architecture review and data-model decisions to implementation, QA, and production deployment.

DraftssTech Technologies | **Full Stack Developer**

Aug 2025 – Feb 2026 · Remote · Contract

- ▶ Engineered and scaled a multi-tenant SaaS platform (Django, DRF, PostgreSQL, Redis, Celery, React/TypeScript), reducing average API response time by ~80% through query optimisation, strategic caching, and async task offloading via Celery.
- ▶ Designed and shipped secure OAuth 2.0 integrations with Salesforce, HubSpot, Google Sheets, Pipedrive, Zapier, and n8n, enabling intelligent two-way data sync and automating manual CRM workflows for enterprise customers.
- ▶ Built AI-assisted workflow automation including Zapier connector plugins and n8n webhook orchestration pipelines that eliminated repetitive data-entry tasks and reduced manual operations overhead for client teams.
- ▶ Provisioned and maintained production AWS infrastructure (SNS for event-driven notifications, SES for transactional email, CloudWatch alarms, Route 53 DNS), paired with end-to-end Sentry observability — achieving reliable uptime for live SaaS customers.

- ▶ Collaborated across product, design, and QA in a cross-functional team, delivering features on schedule while maintaining code quality through PR reviews and CI pipelines (GitHub Actions, Docker).

Hayara IT Services Pvt Ltd | Software Developer

Jun 2023 – July 2025 · Varanasi, UP

- ▶ Built and maintained RESTful microservices in FastAPI with PostgreSQL, implementing JWT and OAuth-based authentication; reduced API response latency by 40–60% through Redis caching, database index tuning, and ORM query optimisation.
- ▶ Developed full-stack SaaS applications with React.js and Tailwind CSS, taking features from Figma designs through to production deployments; managed backend infrastructure on AWS S3 and Azure Blob Storage.
- ▶ Constructed end-to-end ETL pipelines using DBT, Snowflake, and Azure Data Factory, automating data ingestion and transformation for analytical workloads — cutting manual data-prep effort and enabling near-real-time reporting.
- ▶ Delivered secure, scalable authentication flows (JWT, OAuth) across multiple product lines, and contributed to backend architecture decisions on data modelling and API contract design.

Logic Inventor Technologies | Software Engineer Intern

Oct 2022 – Mar 2023 · Varanasi, UP

- ▶ Developed and optimized REST APIs, improved backend performance and database queries, implemented business logic, and collaborated with frontend developers to ensure efficient data flow and reliable API integration.

KEY PROJECTS

PayPilot AI — Enterprise Payroll, HR & Employee Self-Service Platform - <https://payroll-saas-omega.vercel.app>

- ▶ Designed and implemented a secure dual-role authentication system with dedicated Employer and Employee portals, featuring role-based access control and seamless dashboard routing.
- ▶ Built an asynchronous SMTP email service using FastAPI BackgroundTasks to automate branded welcome emails and 6-digit OTP verification for secure user onboarding.
- ▶ Modernized the authentication flow by consolidating multiple login pages into a unified React 19 glassmorphic modal using Tailwind CSS and Context API, improving user experience and reducing navigation overhead.
- ▶ Integrated OAuth 2.0 PKCE authentication with Slack and Jira, enabling secure third-party connectivity and enterprise workflow synchronization.
- ▶ Adopted Test-Driven Development (TDD), achieving 100% unit test coverage for core authentication modules using Pytest and Vitest to ensure production-grade reliability.

DocuChat — Production RAG Document Intelligence System - <https://ai-doc-chat-flax.vercel.app>

- ▶ Designed and shipped a document search and Q&A system powered by LangChain and FastAPI; implemented vector-based document ingestion (chunking, embedding, retrieval) enabling semantic search over large document corpora with sub-second query latency.
- ▶ Architected the retrieval pipeline with context-window management and re-ranking strategies, achieving high-relevance answers on multi-page PDFs — production-ready architecture suitable for enterprise knowledge-base use cases.

WeConnect — Real-Time Chat Platform with Pub/Sub Architecture - <https://we-connect-teal.vercel.app>

- ▶ Built a scalable real-time messaging platform using FastAPI (WebSockets), Redis Pub/Sub, and React.js; designed room-based message routing and presence management supporting concurrent connections with low-latency delivery.
- ▶ Implemented persistent message history with PostgreSQL and async Celery workers for notification dispatch — demonstrating event-driven backend architecture aligned with production chat systems.

EDUCATION

Master of Computer Applications (MCA)

Arunachal University of Studies

Bachelor of Computer Applications (BCA)

Mahatma Gandhi Kashi Vidyapeeth University
