Professional Summary

Backend-focused Full Stack Engineer with 3 years of experience building scalable SaaS applications using Django REST Framework, FastAPI, React, and PostgreSQL. Strong expertise in OAuth 2.0 integrations, third-party API systems, and backend performance optimization. Experienced in deploying and maintaining production-grade cloud applications using AWS and modern DevOps tools.

Skills

- **Languages:** Python, JavaScript, TypeScript
- **Backend:** Django, DRF, FastAPI
- **Frontend:** React, Next.js, Tailwind CSS, Shadcn UI, Bootstrap
- **Databases:** PostgreSQL, MySQL
- **DevOps / Tools:** Docker, Redis, Celery, GitHub Actions, Sentry
- **Auth & APIs:** OAuth 2.0, JWT, Webhooks, Zapier, Salesforce, HubSpot, Google Sheets, n8n
- **AI/LLM:** LangChain
- **Cloud:** AWS (SNS, SES, CloudWatch, Route53), Render, Vercel

Experience

Full Stack Engineer | DraftsTech Technologies | Remote

Aug 2025 – Feb 2026 (Full-Time, 6-Month Contract)

- Developed and maintained multi-tenant SaaS platforms (ClientPortalOS, Deliveryman.ai) using Django/DRF, PostgreSQL, Redis, Celery, and React (TypeScript).
- Optimized REST APIs, reducing response times by ~80% and lowering bandwidth consumption.
- Implemented OAuth 2.0 integrations (Salesforce, HubSpot, Google Sheets, Pipedrive, Zapier, n8n) with secure refresh-token handling.
- Built and maintained Zapier connectors with webhook automation flows.
- Configured AWS SNS, SES, CloudWatch, Route53; monitored production via Sentry.
- Collaborated across frontend and backend teams to ship scalable production features.

Software Developer | Hayara IT Services | Jun 2023 – Dec 2024 | Varanasi

- Developed backend services using FastAPI and PostgreSQL with optimized ORM-based query handling.
- Reduced API response latency by 40–60% through caching strategies and database query optimization.
- Built full-stack SaaS applications using React.js and Tailwind CSS.
- Designed scalable REST APIs and implemented secure authentication (JWT, OAuth flows).
- Developed ETL pipelines using DBT, Snowflake, and Azure Data Factory.
- Integrated AWS S3 and Azure Blob Storage with backend systems.
- Managed deployments using Render and Vercel with CI/CD pipelines and monitoring.

Software Engineer Intern | Logic Inventor Technologies | Apr 2019 – Jan 2020

- Created responsive, user-friendly web interfaces using HTML, CSS, JavaScript, React.js, and Tailwind CSS.
- Worked closely with backend developers to integrate APIs and ensure seamless UI performance.

Projects

AI-Doc Chat — LLM Document Search & Chat

- Built document upload + retrieval-based QA system using FastAPI and LangChain.
- Implemented embedding-based semantic search with Redis caching for faster responses.
- Deployed full-stack application on Vercel and Render.

WeConnect – Real-time Chat Application

- Developed real-time chat platform with FastAPI, Redis, and React.
- Implemented JWT/OAuth authentication and protected routes.
- Integrated AI chatbot using LLM APIs and deployed with CI/CD.

TaskMaster – Scrum & Productivity App

- Built task management system using Django REST Framework and PostgreSQL.
- Integrated AI moderation and task content suggestions.
- Deployed backend and frontend with automated pipelines.

Education

- MCA – Arunachal University of Studies (2023–2025)
- BCA – MGKVP (2020–2023)
